## Agenda Item 6 Report

### Agenda Item 6 Report

- 6. To authorise the sealing of documents
- 6.1 Ginnel Chiltern Avenue to Highways Avenue

To sign three TP1 Land Registry forms and 3 maps for 3 plots of land off Chiltern Avenue which form a ginnel from Chiltern to Highways Avenue. The forms are to transfer ownership from two houses to the Parish Council and sent to the Council from its Solicitors.

Councillors can view these documents by request, they will not be circulated as they contain personal details of home owners and their property details.

**Recommendation:** To authorise the Chairman to sign all the documents.

As there is no timescale for when the ownership of the land will transfer exactly and the path is uneven and a trip hazard this may be an opportunity to look at quotes for the path works so it can be ordered as soon as title is transferred.

The Solicitor is attempting to get agreement from the parties for the works to be done prior to the title transferring – this will be a legal document to allow us access to their land prior to transfer.

Three contractors were asked for quotations, two have submitted a quote:

<u>Contractor 1</u> - £7,865

Contractor 2 - £5,400 (old quote so asked for revision)

**Recommendation:** To authorise the Clerk to get up to date quotations and agree in advance for the work to be done up to a maximum budget.

## Agenda Item 6 Report

## 6.2 Diocese Land on Wigan Road

If the documents arrive in time to meet the deadlines for this meeting. To sign the sale documents to transfer ownership of this land from the Blackburn Diocese to the Parish Council and authorise the payment.

**Recommendation:** To authorise the Chairman to sign all the documents and authorise the payment to Blackburn Diocese of the purchase price of £30,000.00.

As there is no timescale for when the ownership of the land will transfer it may be wise to look forward to the first safety work which needs to be undertaken. This could also be a request to the Diocese to see if they would allow this survey work to be undertaken prior to the ownership being finalised – so we can be aware of the work necessary, in the interest of safety, and line up a contractor to quote and standby to do the work.

A comprehensive tree survey needs to take place to identify any tree works which need to be done for safety reasons.

Three companies in the vicinity were asked for a quotation for the survey works, two responded and the prices are below.

#### **Recommendations:**

- To agree on which survey to take
- To agree when to have the survey done:
  - to request permission from the Diocese to undertake the survey work prior to the ownership being finalised
  - o or order the work when ownership is finalised

## Agenda Item 6 Report

Tree survey costs

#### Contractor 1

Both reports would include details of required work but only full report would record the each species of tree and their overall condition and details.

Price including VAT and subject required detailed information on each report. Site meeting would be required to discuss details to confirm everything.

We can also carry out any tree work that maybe required in line with British Standards BS3998.

- To survey each tree with details and provide a Arboriculture report including map would be £860.
- If you just wanted a general survey of the area with short report with just highlighting trees require work that would be £665.

#### Contractor 2

See quotation attached in full £900 plus extras

#### Edited quotation

Professional member of the Arboricultural Association (AA) and Consulting Arborist Society (CAS) and am qualified to Foundation degree level with additional training in specialist subject areas.

I have current professional indemnity and public liability insurance at the required level to undertake such work.

Travel to site and carry out a "Visual Tree Assessment" (VTA) of the trees on site as requested, (approximately 100 tree/s / 0 group/s) as per the supplied map and produce a single report to show the tree/s location, condition and list any appropriate recommended remedial works.

This will take the form of a <u>walkover survey</u> with a defect led reporting system, for example, if a tree was free from significant defect and did not require any works then it would not be recorded, if a tree did have a significant defect and / or required work undertaking then this tree would be plotted and tree data recorded with recommendations noted, this would take on the guidance listed below.

Where deemed necessary trees close to main roads and footpaths will be plotted even if no work is needed, this is to demonstrate the risk to the "target" has been suitably assessed.

The methodology employed in the assessment of trees undertaken by \*\*\*\* takes into consideration the following points (but not in any order of importance) by firstly carrying out a Visual Tree Assessment (VTA), this includes:

- A distance visual assessment of the tree.
- The exposure to the weather.
- The prevailing ground conditions.
- Any information as to the trees history or history of the surrounding trees / landscape.
- Knowledge of previous documented information of issues with a species.
- The health and visual defects of the tree.

From this information, an assessment is made of the likelihood of the part/s most likely to fail in relation to the target / occupancy value within the trees failure area and recommendations are then made, these can include the following but is not exhaustive:

- Recommendations for further visual monitoring.
- Investigation with more advanced decay detection equipment such as a Resistograph\*\*\*.
- Remedial pruning / limb removal.
- Whole tree removal.
- Pruning for aesthetical reasons.
- · Removal of significant deadwood.
- Or, no work may be needed.

The primary reasoning behind this method of assessment is to identify a foreseeable failure, make an informed decision and act on it within a specified time and know that the response is reasonable in relation to the target area and the financial resources available.

\*\*\* Advanced decay detection assessments are carried out as an additional charge as per "Additional Works" below.

Metal tree tags are attached to the tree to aid individual identification in relation to the tree data collected (added when there could be difficulties identifying specific trees). These are chargeable per tree surveyed.

£2.00 per tree

Formal enquiry to the local planning authority to ascertain the presence of any TPO / Conservation Area within the site boundary.

#### **Agenda Item 8 Report**

8.1 All Purposes Committee – consider costings for the replacement path at the junction of Highways Avenue and Balshaw Lane

The land is owned by Euxton Parish Council.

The land is a pathway from the pedestrian crossing on Balshaw Lane, diagonally across the corner of Balshaw Lane and Highways Avenue to the path linking up to the shops pedestrian walk way.

Over time the tarmac surface has broken and lifted with tree roots and is now very uneven and a trip hazard.

The All Purposes Committee has agreed for a planting project on the boundary line of the path and the shops parking area at the Balshaw Lane side of the plot, so when the path is replaced a hedge bed can be created.

Two costings have been requested from contractors we have used for similar works.

Contractor 1 - £8,389.00

Contractor 2 - £ verbal update

**Recommendation:** To authorise the Clerk to obtain up to date costings for the works and order the works up to a specified value.
